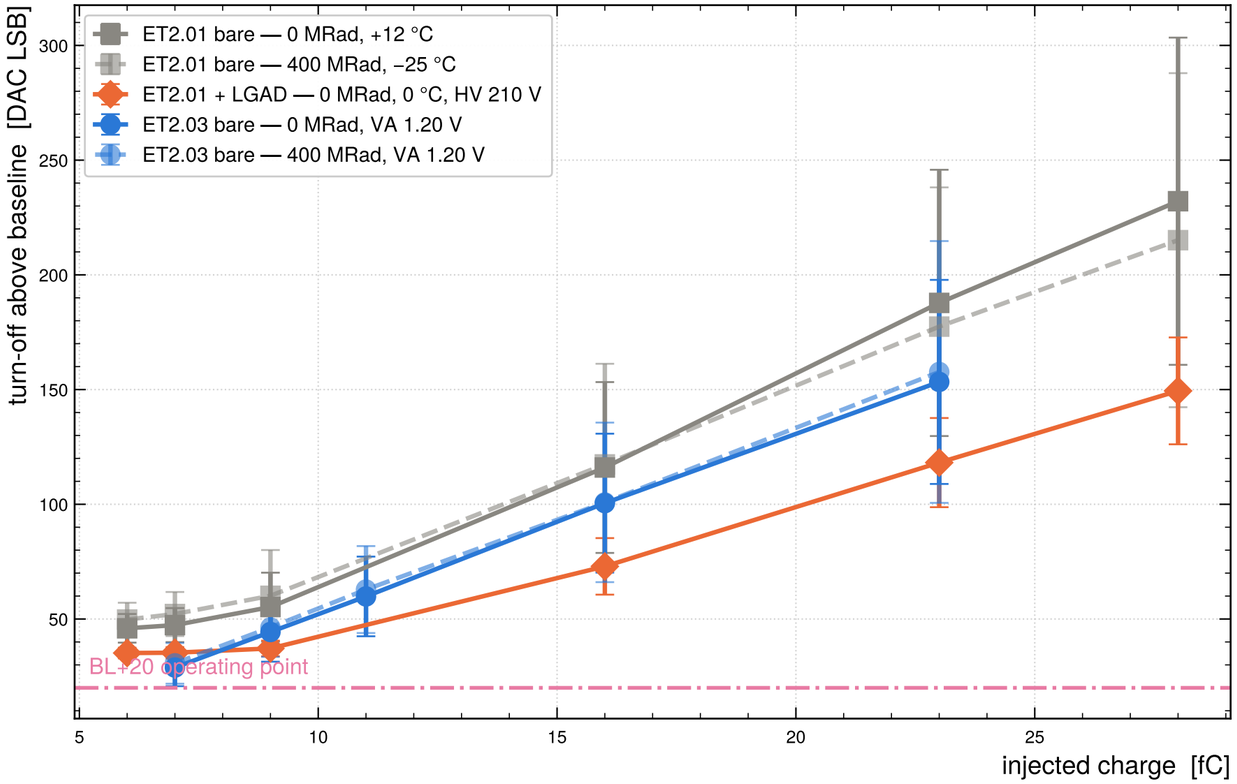
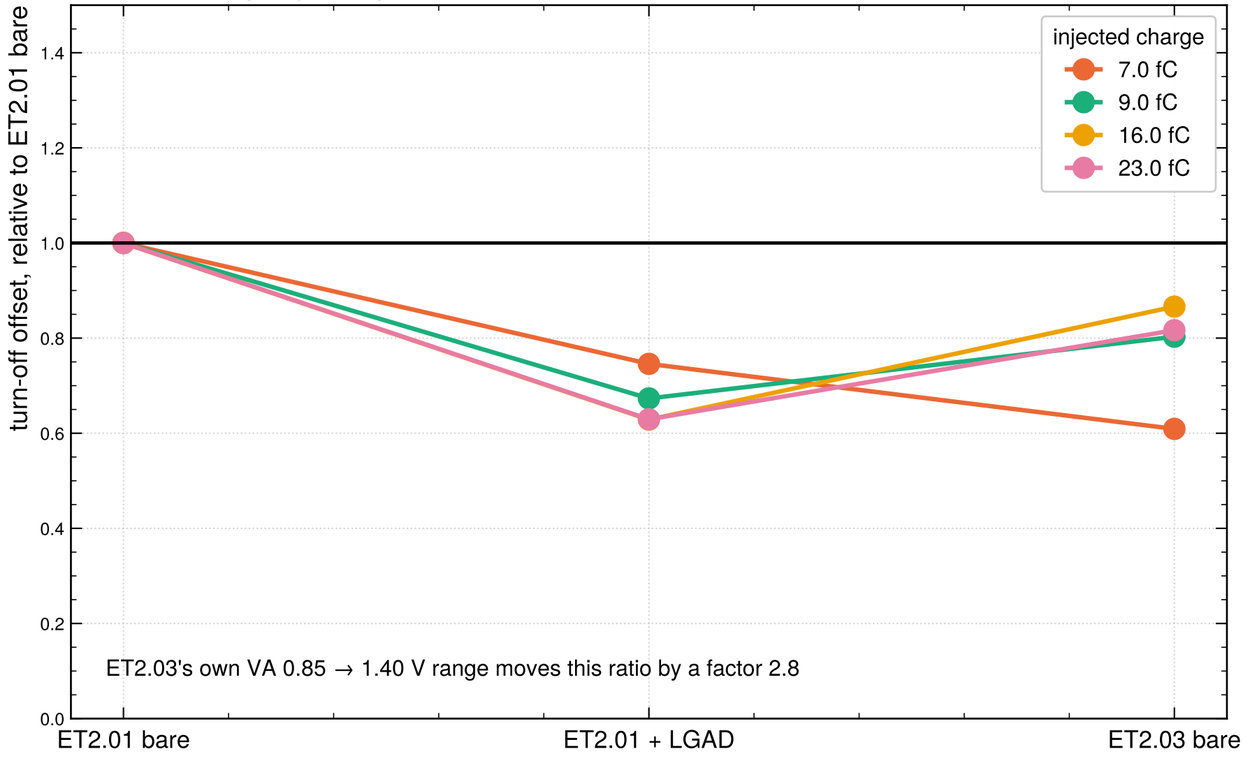
CMS *ETL ETROC Charge Injection*

Turn-off referred to baseline, across three data sets
ET2p01_W36_6, ET2p01_Bar4 + LGAD, ET2p03_BARE9; same 50 % estimator on the January sets, the campaign's own converged DAC on the August set
ET2.01 and ET2.03, January and August 2024

dose moves these curves far less than the chip does





the ratio, charge by charge
